BIO

Gary Stilwell is a medical physician, a Wharton MBA and a University of Edinburgh MSc honors graduate with global experience in design-driven innovation. Raised as an engineer, he enjoys taking things apart and discovering how they work. Driven by the chance to learn, to contribute and to make a difference, he has been the beneficiary of extraordinary opportunities.

Gary is currently a principal partner at mindlab.ai, exploring the emerging field of computational psychiatry while embedding a range of technologies with personalized algorithms to improve the diagnosis, treatment and prevention of mental illness globally. Over the previous three years, he had been a Fellow in MIT's Advanced Study Program, enrolled in a rigorous curriculum across MIT's six schools with concentrations in Technology & Entrepreneurship.

His work history features roles in medical product design & development with Philips Healthcare, Medtronic, J&J LifeScan, and the Gates Foundation as well as in impact investment at Acumen East Africa, Yunus Balkans, and iLab Mexico. He worked at Yale on a NASA telemedicine program, in Japan on a photocopier assembly line, and at MTV when it was a startup. He shares a patent for an implantable cardioverter-defibrillator with his engineer colleagues.
